

M. RIVALDO DESTADHIO HZ

+62 89624574877 | mrivaldodestadhiohamzah@gmail.com

PROFESSIONAL SUMMARY

Telecommunication Engineering graduate from Telkom University with hands-on experience in full-stack web development through bootcamps, academic projects, and internships. Skilled in Node.js, Express.js, Vite, Tailwind CSS, and Supabase, with a passion for building modern, responsive, and user-friendly web applications. A fast learner, adaptable, and collaborative team player eager to contribute to innovative software development projects.

EXPERIENCE

Dicoding Indonesia - Coding Camp SMK 2026 powered by DBS Foundation

Facilitator | January 2026 - June 2026

- Guided participants in understanding programming and technology concepts.
- Assisted participants throughout the learning process and coding practices.
- Helped participants complete assignments and overcome coding challenges.
- Coordinated with the organizing team to ensure smooth learning activities.

Dicoding Indonesia - DCN Telkom University

Community Builder (Front-End) | October 2025 - May 2026

- Managed a Front-End learning community and supported members in understanding HTML, CSS, JavaScript, and React.
- Organized mentoring sessions, technical discussions, and project reviews.
- Collaborated with the DCN team to develop community activities and educational content.

PT Telkom Infrastruktur Indonesia (Infranexia) - Bekasi District

Intern | June 30 - August 9, 2025

- Performed optical cable attenuation measurements using an Optical Time Domain Reflectometer (OTDR).
- Assisted technicians with fiber optic splicing (fusion splicing) and maintenance of network equipment such as NGN and Metro devices.
- Participated in daily operations, including equipment cleaning and usage data updates.
- Attended technical meetings and division evaluations while supporting module and data delivery to Telkom Regional.

Coding Camp 2025 - Dicoding x DBS Foundation

Independent Study Program Participant | February 10 - July 16, 2025

- Learned full-stack web application development, covering both Front-End and Back-End technologies.
- Built and tested RESTful APIs using Node.js and Express.js.
- Applied modern technologies such as Tailwind CSS, Vite, Supabase, and IndexedDB.
- Developed a web-based Capstone Project integrated with Machine Learning features.
- Strengthened teamwork, communication, and time management skills through ILT sessions and weekly discussions.

Telkom Test House

Intern | January 14 - February 14, 2025

- Collected RF interface data using a spectrum analyzer.
- Assisted in preparing Quality Assurance Test Reports.
- Supported the creation of RF interface summaries and documentation.
- Extended and connected Wi-Fi antenna cables.

Badan Pusat Statistik (BPS) Palembang

Data Entry Intern | June - July 2022

- Entered census population data into computer systems.
- Reviewed and corrected census data records.
- Conducted data validation and verification to ensure data accuracy.

EDUCATION

Telkom University

2022-2026

Fakultas teknik elektro | Teknik telekomunikasi

IPK: 3.29

SKILLS

JavaScript, TypeScript, Python, C#, React, Next.js, Node.js, Express.js, ASP.NET Core, FastAPI, HTML, CSS, Tailwind CSS, PostgreSQL, Supabase, Git, GitHub, Docker, Vercel

PROJECTS

HireFlow – AI-Powered Recruitment Platform

Full-Stack Developer | Next.js, TypeScript, React, ASP.NET Core, PostgreSQL, FastAPI, Tailwind CSS, Docker, GitHub Actions, Vercel

- Developed a full-stack recruitment platform designed to streamline job posting, candidate management, recruitment pipelines, and interview scheduling.
- Built a responsive SaaS interface and recruiter workspace using Next.js, React, TypeScript, and Tailwind CSS.
- Implemented recruiter features including job creation, candidate search, pipeline management, interview management, and candidate profile views.
- Developed an AI-assisted candidate analysis feature and integrated backend service foundations using ASP.NET Core, PostgreSQL, and FastAPI.
- Configured Docker Compose and GitHub Actions to support a structured development and deployment workflow.
- Deployed the application on Vercel and maintained a production-ready build with validated linting and testing.

NERVA – AI-Powered Mental Health Platform

Full-Stack Developer | JavaScript, Python, Node.js, HTML, CSS, Tailwind CSS, Vite, Supabase, AES-256, Vercel

- Developed an AI-powered mental health platform featuring DASS-21 assessments, journaling, and personalized emotional insights.
- Built responsive and interactive user interfaces using HTML, CSS, Tailwind CSS, JavaScript, and Vite.
- Developed backend services with Node.js and integrated Python for AI-powered analysis and recommendations.
- Managed authentication and database services using Supabase while securing sensitive user data with AES-256 encryption.
- Deployed the application on Vercel for reliable performance and accessibility.

StoryNest – Digital Storytelling Platform

Front-End Developer | HTML, CSS, JavaScript

- Developed a responsive web platform that enables users to create, organize, and explore personal stories.
- Built interactive user interfaces with story management, collections, and location-based visualization.
- Implemented responsive layouts and intuitive navigation to improve usability across multiple devices.
- Focused on clean code structure and an engaging user experience.

Notes Studio – Note Management Application

Front-End Developer | HTML, CSS, JavaScript

- Developed a responsive note management application for creating, organizing, and managing personal notes.
- Implemented search, categorization, and intuitive navigation to improve productivity.
- Designed a clean and user-friendly interface with responsive layouts for different screen sizes.
- Applied modern JavaScript practices to deliver an interactive and seamless user experience.

Portfolio

CERTIFICATIONS

Fundamental Web Application Development with React

Dicoding Indonesia × DBS Foundation

Credential ID: GRX5JWYYXOM | Issued: 03 November 2025 – 03 November 2028

- Studied React fundamentals including PropTypes, client-side routing, component lifecycle, React Context, and Hooks.
- Applied reusable and modular component architecture to develop efficient React applications.
- Completed a final project implementing core React concepts in a functional web application.

Web Application Development with React

Dicoding Indonesia × DBS Foundation

Credential ID: QLZ9690O7Z5D | Issued: 30 October 2025 – 30 October 2028

- Learned React fundamentals including functional, stateful, and controlled components.
- Built reusable, declarative, and reactive user interfaces using React.
- Completed a final React application project applying core concepts and UI component development.

Coding Camp 2025 – Dicoding × DBS Foundation

Full-Stack Web Development (Front-End & Back-End)

Credential ID: CC25/GRAD/XXV-07/FC012D5Y1749 | Program: 10 February – 16 July 2025

- Completed a project-based full-stack web development program covering both front-end and back-end development.
- Developed RESTful APIs using Node.js and Express and worked with Supabase for database management.
- Applied modern web technologies including Vite, Tailwind CSS, Service Worker, Push Notifications, and IndexedDB.
- Completed a capstone project integrating Machine Learning with a web application.
- Strengthened teamwork, communication, and time management skills through collaborative development.

Back-End Development with JavaScript for Beginners

Dicoding Indonesia × DBS Foundation

Credential ID: 1RXYEG7OQZVM | Issued: 28 May 2025 – 28 May 2028

- Learned back-end fundamentals, RESTful API architecture, HTTP client-server communication, and Node.js.
- Worked with NPM for package and module management and built RESTful APIs using Hapi.
- Tested APIs using Postman and learned basic deployment using Amazon EC2.
- Completed hands-on development of RESTful APIs as a foundation for modern back-end services.

Fundamental Front-End Web Development

Dicoding Indonesia × DBS Foundation

Credential ID: NVP75L73VXRO | Issued: 26 April 2025 – 26 April 2028

- Developed modular, reusable, and optimized front-end web applications.
- Applied HTML Forms, CSS Grid, Web Components, NPM, and Webpack in web development.
- Implemented asynchronous JavaScript requests to retrieve and manage data from Web APIs.
- Built structured and efficient front-end applications following modern development practices.

Front-End Web Development for Beginners

Dicoding Indonesia × DBS Foundation

Credential ID: ERZRED80QXYV | Issued: 07 March 2025 – 07 March 2028

- Learned fundamental front-end web development concepts, including the Browser Object Model (BOM) and Document Object Model (DOM).
- Implemented DOM manipulation and JavaScript events to build interactive web interfaces.
- Applied the Web Storage API and different storage mechanisms for client-side data management.
- Built an interactive front-end web application following modern web development practices.

CERTIFICATIONS

JavaScript Programming Fundamentals

Dicoding Indonesia × DBS Foundation

Credential ID: 4EXGVJQEIXRL | Issued: 19 March 2025 – 19 March 2028

- Learned JavaScript syntax, reusable functions, and data structures including Objects, Arrays, Maps, and Sets.
- Applied ECMAScript Modules, Object-Oriented Programming (OOP), and Functional Programming concepts.
- Worked with program flow and asynchronous programming to develop structured and maintainable applications.
- Applied coding best practices to improve code quality and maintainability.

Web Programming Fundamentals

Dicoding Indonesia × DBS Foundation

Credential ID: NVP75N79GXRO | Issued: 28 February 2025 – 28 February 2028

- Learned HTML and CSS fundamentals for building structured and visually appealing websites.
- Applied semantic HTML and CSS styling techniques to develop web pages.
- Implemented responsive layouts using CSS Flexbox.
- Completed a practical web development project and final assessment.

Introduction to Programming Logic – Programming Logic 101

Dicoding Indonesia × DBS Foundation

Credential ID: 1RXYEIV09ZVM | Issued: 16 February 2025 – 16 February 2028

- Learned fundamental programming logic and algorithmic thinking.
- Studied logic gates including AND, OR, and other basic logical operations.
- Applied computational thinking and programming logic to practical case studies.

Git and GitHub Fundamentals

Dicoding Indonesia × DBS Foundation

Credential ID: 6RPNR1Y8X2M | Issued: 16 February 2025 – 16 February 2028

- Learned Git fundamentals including repository management, commits, checkout, branching, merging, and conflict resolution.
- Applied GitHub collaboration workflows including forking, squashing, pull requests, and code reviews.
- Used GitHub as a professional portfolio by creating and maintaining project documentation with README files.

Programming Fundamentals for Software Development

Dicoding Indonesia × DBS Foundation

Credential ID: N9ZO9ODE8XG5 | Issued: 14 February 2025 – 14 February 2028

- Learned software development fundamentals including application requirements analysis and development planning.
- Applied HTML, CSS, and JavaScript to modify and develop web applications.
- Practiced documenting software development processes and evaluating application requirements.
